

Tolani Ecosystem — Brand Review & Approval Workflow (SOP)

Purpose

This SOP defines how brand requests are reviewed, approved, or rejected within the Tolani Ecosystem.

Trigger Events

- Creation of a new subsidiary or product
- Launch of a new token or DAO
- Major redesign or rebrand

Review Stages

- Stage 1: Intake submission
- Stage 2: Tier classification review
- Stage 3: Visual and naming compliance check
- Stage 4: Final approval or revision request

Approval Authority

- Tolani Corp: Tier 1 and Tier 2 entities
- Division Leads: Tier 3 experimental brands
- Foundation Board: Impact-related entities

Documentation & Archival

Approved brands are archived in the central Brand Registry. Deprecated brands are recorded for audit history.

Enforcement

Unauthorized brands may be sunset or reclassified to protect ecosystem integrity.
