

Tolani Ecosystem — Naming & Token Symbol Policy

Purpose

This policy governs naming conventions and token symbols across the Tolani Ecosystem.

Entity Naming Rules

- All entities must include a clear relationship to Tolani or an approved sub-brand
- Names must avoid confusion with the parent holding company
- No entity may imply governance authority unless explicitly granted

Token Symbol Rules

- Token symbols must be 3–5 uppercase letters
- Symbols must not conflict with existing major tokens
- Parent-level symbols are reserved exclusively

Prefix & Namespace Strategy

- TOL* reserved for ecosystem-level assets
- Division-specific prefixes recommended for Labs experiments
- Foundation-related tokens must signal non-profit or utility intent

Approval & Reservation

All names and symbols must be reserved and approved prior to public use or deployment.
