

Tolani Ecosystem — Print Color Standards

This specification provides CMYK conversions for print workflows and the official process for selecting Pantone (PMS) equivalents. Pantone numbering and digital libraries are proprietary and are best accessed via licensed tools (e.g., Pantone Connect / Pantone Color Finder).

Pantone (PMS) Matching Policy

- Pantone codes must be selected using licensed Pantone libraries (Pantone Connect / Pantone Color Finder) to ensure accuracy and compliance. ■cite■turn0search1■turn0search23■
- Pantone's numbering system and color libraries are proprietary; do not rely on unlicensed sources for definitive PMS values. ■cite■turn0search0■turn0search2■
- For apparel/embroidery, verify under the intended substrate (cotton, poly, nylon) and lighting condition; approve a physical strike-off before production.

Note: CMYK values above are practical starting points for coated/uncoated processes. Always validate with your print vendor's ICC profile and run a proof.
